AFSA R

Chennai, Tamil Nadu | rafsa6879@gmail.com | LinkedIn | GitHub | Portfolio | LeetCode

PROFESSIONAL SUMMARY

3rd-year B.E. Computer Science Engineering student with hands-on experience building full-stack and backend systems, including a government copyright-registered anti-money-laundering platform processing 200,000+ transactions. Comfortable across Flask/FastAPI, React, and SQL/graph databases. Seeking software engineering internships at product-based companies and startups.

EDUCATION

Rajalakshmi Institute of Technology, Kuthambakkam, Chennai *Sept 2024 – 2028 (Expected)*

B.E. Computer Science and Engineering | CGPA: 8.87 | Class Rank: 2nd of 62

Relevant Coursework: Data Structures, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming, Design and Analysis of Algorithms, Machine Learning Techniques, Deep Learning Techniques

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript

Web & Frameworks: HTML, CSS, React, Node.js, Flask, FastAPI, Scikit-learn

Databases: MySQL, MongoDB, PostgreSQL, Neo4j

Tools & Platforms: Git, GitHub, VS Code, Kali Linux (basics)

PROJECTS

Dark Funds — Layered Anti-Money-Laundering Detection System *Registered Copyright, Govt. of India*

Python, Flask, SQLite, NetworkX

- Built an end-to-end AML detection platform for law enforcement use, engineering 5 independent detection algorithms — IQR-based high-frequency detection, percentile-based large-amount flagging, multi-identity tracking, NetworkX-based circular transaction detection, and rapid-movement analysis — to surface suspicious activity across a 200,000-transaction dataset.
- Architected the complete Flask backend, SQLite schema, and REST API, and built an interactive spider-map visualization (using degree, betweenness, and closeness centrality) to trace money trails between linked accounts.
- Sole developer on a 2-student project under faculty guidance; the work was formally registered as a copyright by the Copyright Office, Government of India (Certificate No. SW-2026022438).

DebtMap — Debt Payoff Optimization Platform *Individual Project*

Python, FastAPI, React, Vite

- Built a full-stack personal finance tool that normalizes disparate debt types (credit cards, BNPL, personal loans, EMIs) into a comparable true annualized interest rate, addressing the lack of unified debt visibility for retail borrowers.
- Implemented avalanche and snowball debt-payoff optimization strategies in the FastAPI backend, running month-by-month compound-interest simulations, plus a regex-based SMS parser supporting 4 major Indian bank/lender formats.
- Designed and built the React frontend, including an interactive burndown visualization and real-time savings calculator, independently handling both backend and frontend development.

SpeakPublic — Accessibility Browser Extension *Team Lead, 5-Member Team*

JavaScript, HTML, CSS, Gemini API

- Led a 5-member team to build a browser extension that translates and simplifies complex web content (government notices, hospital forms, bank letters) into regional languages for users with limited English literacy or disabilities.
- Built the browser extension architecture (manifest and content scripts) and designed the overlay UI offering four accessibility modes: Standard (translation), Visual (audio guides), Hearing (sign-language support via an ISL dataset), and Cognitive (simplified icons).
- Integrated the Gemini API to power real-time translation, text simplification, and a readability-scoring feature.

EXPERIENCE

Cybersecurity Internship — Center for Cyber Security, RIT *(Jul 2025):* 20-day hands-on internship covering foundational cybersecurity concepts and Kali Linux command-line basics.

Virtual Internship, Java Programming — CodSoft *(Jul – Aug 2025):* 4-week virtual internship; completed assigned Java programming tasks.

ACHIEVEMENTS

- Ranked 2nd out of 62 students in B.E. CSE (cumulative) | Registered Copyright, Govt. of India, for "Dark Funds" AML system (Certificate No. SW-2026022438)
- 3rd Prize, Gamify Anything Hackathon, WiSTEM Club, RIT (Team Nexus), March 2026 | Finale Round, Triwizardathon 1.0, MLSA–GLA University Chapter, August 2025

CERTIFICATIONS

- Automation Developer Associate Training (UiPath, v2024.10) — ICT Academy Cohort 2, Nov 2025 | C Training — Spoken Tutorial, IIT Bombay (EduPyramids), Score 85%, Aug 2025
- Artificial Intelligence for All — Infosys Springboard, Oct 2025 | DBMS: Fundamentals and Advanced Concepts — Scaler Topics, Jan 2026

LEADERSHIP & ACTIVITIES

- Team Lead, SpeakPublic (5-member team); Member, Image Processing Center, RIT — showcased personal projects (Fruit Ninja, MediLens) to school students at a college outreach event.

Interests: AI/ML, Cybersecurity
